*Fees are approximate, subject to change and exchange rates

Location	Dunedin
Duration	One year full-time; two years part-time
Delivery	Blended; directed study, work-based learning, and self-directed study

Credits	120
Level	8
Start	February 2021
Apply	by 31 January

PORTFOLIO REQUIREMENTS

This qualification is suitable for graduates who have a strong professional design background who want to extend and deepen their research skills and work on applied research projects which are self-generated or developed with industry or community partners.

We welcome applicants from a range of design and creative backgrounds. This is a chance to view your creative area through a different lens and see how you can make it viable in a commercial environment.

Graduates of this qualification will be well-prepared for further postgraduate study such as our Master of Design or Master of Design Enterprise qualifications, or for a career in design or design management.

More information about this programme

This programme is taught in a multi-disciplinary environment which means that your design projects may be more discipline focused e.g. fashion, communication, visual arts, product, spatial design, or explore projects that span and connect disciplines such as interaction design, fashion communication, accessories, food design, multimedia projects, event and experience design to name a few.

A preliminary project proposal helps us to understand what motivates and inspires you to study at postgraduate level. It also allows us to determine if your area fits within our areas of expertise.

Why should you study with us?

- > Employers love our design graduates as they are industry-ready, innovative and hard working.
- > We offer a boutique learning environment; small classes mean your lecturers know you by name and can support you to develop your own 'design identity'.
- > You will benefit from the expertise of award-winning staff and leading industry researchers.
- > You will have access to exhibitions and international competitions to showcase your creativity.

- > Local, national and international collaboration and partnerships are at the heart of our learning philosophy.
- > We have extensive industry connections and strong links with international design networks including the Cumulus Association and The Designers Accord.
- > Our acclaimed programmes are full of individual, team and interdisciplinary learning opportunities.
- > You will enjoy studio-based learning with access to specialised equipment and spaces.

Entry requirements

Minimum entry requirements are:

- > The Bachelor of Design (discipline endorsed) Level 7 OR an equivalent qualification at bachelor level or above. Please send us certified copies of your undergraduate degree transcript and other relevant qualifications.
- > A physical or digital portfolio which demonstrates a depth of engagement with creative work relevant to your field. Please see below for more information.
- > **International applicants** must demonstrate that they have equivalent experience/qualifications as domestic applicants. Click here for your country's equivalent academic entry requirements.
- > If English is not your first language, you must provide:
 - > New Zealand University Entrance OR
 - > Overall Academic IELTS 6.5 with no individual band score lower than 6.0 (achieved in one test completed in the last two years), OR
 - > Acceptable alternative evidence of the required IELTS (see here for NZQA proficiency table and here for list of recognised proficiency tests).

If you need to improve your English Language skills, we offer a wide range of English programmes.

Other requirements

- > We may decide that you need to undertake an interview and/or entry task. We'll contact you if this is necessary.

Your portfolio

Find out what you need to include in your portfolio, what we're looking for, and how to submit it to us.

Selection procedure

An interview panel consisting of the Postgraduate Coordinator and relevant postgraduate supervisors will interview and select applicants. Where there are more applicants than places, candidates will be prioritised on the basis of:

- > strength of academic record
- > breadth and depth of their portfolio
- > an entry task that validates existing skills and knowledge.

Applicants who do not meet the entry or selection criteria will be directed to a path of study to help prepare them for application in the future.

Additional costs

You will be expected to meet the cost of project materials.

You will study

This one-year, full-time programme is comprised of 120 credits at Level 8, divided into two semesters of 60 credits each.

First semester

Professional Design Practice (30 credits)

Develop an understanding of professional design practices, conventions, and professional and legislative frameworks applicable to specific design disciplines and examine what it means to be a sustainable design practitioner from multiple perspectives - cultural, social, environmental and economic.

Applied Design Project 1 (30 credits)

This project, either individual or team-based, employs relevant skills and techniques and explores ideas and issues applicable to your design discipline. You will research and analyse information from a range of sources, and incorporate critique and iteration to arrive at a resolved final design outcome. Sustainability will be addressed throughout the applied research process from cultural, social, environmental and/or economic perspectives.

Second semester

Design Research Methods (15 credits)

Explore a range of design research methods and methodologies and develop an understanding of the context in which research takes place in Aotearoa New Zealand and globally. You will use this background exploration to develop a literature/context/artefact review and proposal for an applied design project/ major research project which incorporates appropriate methodologies.

Applied Design Project 2 (45 credits)

This larger applied design project allows you to develop a design brief or expand an existing project, exploring skills, techniques, ideas and issues relevant to your design discipline. Through market research, analysis of information from a range of sources and incorporation of critique, you will arrive at a resolved final design outcome/artefact. The applied research process will address sustainability from cultural, social, environmental and/or economic perspectives. Projects can be individual or team-based, student- or client-driven, studio- or workplace-based.

Please note: Applied Design Project 1 and 2 may be treated as one larger project with two assessment points.

Your workload

You will be expected to spend around 12 hours per week in directed study and work-based learning, and a further 26 hours a week in self-managed study.

Further study options

Successful completion of this qualification will prepare you for further postgraduate study in our Master of Design or Master of Design Enterprise qualifications (or equivalent), or for a career in design or design management roles.

Student loans and allowances

Full-time domestic students of this programme are eligible for student loans and allowances (dependent on age and financial circumstances.) Please contact Studylink for additional information. Phone 0800 88 99 00 or visit: www.studylink.govt.nz

Recognition of prior learning

Recognition of Prior Learning including Cross Credit or Credit Transfer is offered for up to 60 credits in this programme. This process will normally apply to a student who has completed formal study at an equivalent level at Otago Polytechnic or another institution.

Advanced Standing is available for up to 60 credits of this programme through the process of Assessment of Prior Learning. Students may use a combination of formal and informal learning experiences to support their application.

Please note: Applied Design Project 2 is not eligible for credit recognition.

Disclaimer

While every effort is made to ensure that this sheet is accurate, Otago Polytechnic reserves the right to amend, alter or withdraw any of the contained information. The fees shown in this document are indicative ONLY. Both domestic and international fees are subject to change and are dependent on the development and implementation of Government policies. Please note that additional fees may from time to time be required for external examination, NZQA fees and/or additional material fees.
